

Assured Smile Program

Your implant supported bridge(s)/denture and supporting implants are covered by a limited 20-year program. If a dental implant fails to integrate or the implant bridge breaks or requires replacement or repair, we will remedy with a \$500 deductible per occurrence for 20 years.

Assured Smile Program

An active Assured Smile Program requires biannual visits to our Woodside Dental Group office. At each visit, medical history is updated and reviewed, an implant examination is performed, any necessary radiographs are taken, assessment and occlusal adjustment are carried out as needed, and cleaning is performed. We will identify if there are problems or potential problems that require attention. Our process will help to ensure the long-term success of your implant supported bridge(s)/denture and implants. Biannual appointments are required to maintain your active Assured Smile coverage.

Dental implants are susceptible to inflammation and bone loss when plaque accumulates. Your home hygiene routine can significantly influence long-term success and failure. After your implant surgery, a specific home-care routine is developed for you that you are expected to maintain for the Limited Warranty program coverage.

In the first 24 months after surgery, if a dental implant fails or the implant bridge(s) breaks, we will replace or repair as needed at no additional charge. After this timeframe, if a dental implant fails or the implant bridge(s) breaks or requires replacement or repair, we will repair or replace with a \$500 deductible per occurrence for up to 20 years as long as you maintain an active Limited Warranty plan.

\$600 Fee for warranty due by 1/31 of each year includes complimentary:

- Annual Exam
- Bite analysis and adjustments
- Implant maintenance and inspection
- Removal, polish and reinsertion of bridge
- Change hardware if needed
- 1 additional cleaning

If additional cleanings are recommended, a separate treatment plan will be presented.
